WILL SOON REFOREST MANTI RESERVATION

(Special Correspondence.)

Mt. Pleasant, Oct. 31.-Officials of the Manti forest reserve are attempting an undertaking this fall that will require much time, and cost the United States much time, and cost the United States government a good many dollars. The result will be far-reaching and will pay the government well for money invested. The proposition is the reforestization of the reserve. Trees are being planted that will take the place of planted that will take the place of those taken from it during past years. Attempts have been made to plant the seed of the new trees on the mountains. seed of the new trees on the moun-tains, thinking it would avoid the work tains, thinking it would avoid the work and expense of transplanting, but these attempts were failures, because the birds and squirrels dug up the seeds before they sprouted. The work is in charge of Supervisor C. L. Smith and Asst. Ernest Winkler. This fall the attempt is being made on a small scale, but next year it is intended that a good portion of the reserve will be covered, so that in time it will be covered with a new coat of timber. This year \$5,000 trees are being planted in the Ephraim canyon, consisting of young trees, yearlings, that have been taken there for the purpose. They are nearly all of the purpose. They are nearly all of the yellow pine variety. A force of 20 men are now engaged in the work. Next year if possible all portions of the reserve will be planted to the new forest.
